BANGALORE INDIA · JUNE 24-26

- DAY 1 FRIDAY, JUNE 24 2016
- DAY 2 SATURDAY, JUNE 25 2016
- DAY 3 SUNDAY, JUNE 26 2016

Selenium Grid in the Cloud for Real Devices & Browsers.

BrowserStack is a web and mobile testing platform trusted by over 33,000 customers worldwide including jQuery, Microsoft, Wikipedia, Twitter, Airbnb, and more. We provide a Selenium grid in the cloud for real desktop browsers and physical mobile devices for a seamless testing experience. This eliminates the need of an expensive test setup, virtual machines, and in-house device labs.

Our cloud infrastructure has 1000+ browsers for 11 desktop OSes and multiple versions of iOS and Android devices, instantly accessible for the fastest and most accurate execution of your tests. Use your favorite test frameworks to run your tests in parallel, integrate with your preferred CI tool, and test private and staging servers using Local Testing.
